Production Planning and Control

SKILLS & COMPETENCES

I like learning new things and I learn easily. I am sure that I will contribute a lot to the company I will work for with my teamwork, easy adaptation, productivity, communication, presentation and management skills. In this process, I will add as much to myself as I contribute to the company. One of my biggest aims is to add value to my country, the company I work for, and myself. I have taken courses such as Distribution Logistics, Scheduling and Sequencing, Marketing Information and Strategy, Marketing Operations, and Technology in Innovation Management as technical elective courses so far.

•AutoCad
•Excel (Intermediate)
•Minitab (Beginner)
•Matlab (Beginner)
